Jann Niño Armar Vega

Full Stack Developer

Malaybalay City, Northern Mindanao, Philippines

Summary

Full Stack Developer with over 7 years of hands-on experience delivering robust, maintainable, and scalable software solutions for web, mobile, and geospatial platforms. I specialize in end-to-end application development, bridging complex backend architecture with intelligent, modern frontend frameworks. As a dual-stack expert, I am highly proficient in the VILT Stack (Vue 3, Inertia.js, Laravel, Tailwind) for rapid enterprise development and the MERN Stack (MongoDB, Express, React, Node.js) for high-performance JavaScript environments. Having scaled alongside Laravel since its early releases, I build secure, modular systems that integrate seamlessly with advanced AI models, custom RESTful endpoints, and location intelligence tools. Recently, my focus has been on engineering dynamic Survey Builders and intelligent data-collection platforms—supercharging standard forms with GIS mapping (Leaflet.js) and AI-driven automation for predictive analysis, smart data validation, and automated insights.

Key Skills & Technologies

The VILT Stack: Expert-level Laravel & Vue 3 integration via Inertia.js, creating seamless SPA experiences with a powerful PHP backend.

The MERN Stack: Building scalable, non-blocking applications using MongoDB, Express, React, and Node.js.

AI & Automation: Integrating LLMs and intelligent workflows into web apps (dynamic content generation, predictive data analysis, automated reporting).

Geospatial & Surveys: Advanced implementation of Leaflet.js and Google Maps APIs; engineering complex, conditional drag-and-drop survey builders.

Mobile & Hybrid: Hybrid mobile app development using Ionic with Cordova.

Backend & APIs: PHP (Laravel), Python (Django), Node.js, and secure RESTful API design.

Frontend & Design: Vue 3, React, Tailwind CSS, and highly responsive UI/UX architecture.

Infrastructure & Data: MySQL, SQL, MongoDB, Bash scripting, Git, and CI/CD workflows.

Verified Excellence: Ranked in the Top 10% globally for both PHP and JavaScript proficiency via TestDome, ensuring high-quality, production-ready code that meets international standards.

Experience

SPLIT SECOND RESEARCH LIMITED

Full Stack Web Developer

August 2018 - Present (8 years 1 month)

London Area, United Kingdom

Developed and maintained an interactive marketing research survey system using Laravel 12, Vue 3, Inertia.js, and Tailwind CSS, enabling efficient data collection and improved consumer behavior analysis.

Open AI integration for chatbots.

Built responsive and dynamic single-page application features, improving user experience and system performance for internal research tools.

Maintained and enhanced the company WordPress website, implementing plugins, custom themes, and SEO optimizations to improve functionality, performance, and user engagement.

Geft Consultancy Services

Search Engine Marketing Specialist

January 2023 - August 2023 (8 months)

LM Telecom

Site Acquisition Officer, LM Telecom

May 2022 - February 2023 (10 months)

Cagayan De Oro City, Northern Mindanao, Philippines

Managed and maintained geospatial data and GIS mapping systems to support city planning, land management, and local government projects.

Created and analyzed digital maps and geographic datasets, collaborating with city departments to improve spatial data accuracy for infrastructure and public service planning.

Malaybalay City Hall

Geological Information System Specialist

June 2020 - May 2022 (2 years)

Malaybalay City, Northern Mindanao, Philippines

Managed and maintained geospatial data and GIS mapping systems to support city planning, land management, and local government projects.

Created and analyzed digital maps and geographic datasets, collaborating with city departments to improve spatial data accuracy for infrastructure and public service planning.

Philippines National Police

Admin Aide

June 2019 - May 2020 (1 year)

Malaybalay City, Northern Mindanao, Philippines

Provided administrative and clerical support, including document preparation, record keeping, and data entry for daily police station operations.

Organized and maintained official reports, case files, and correspondence, coordinating with officers and staff to ensure accurate documentation and efficient handling of public inquiries

NeuroSense

Programmer

April 2016 - June 2018 (2 years 3 months)

United Kingdom

Developed and maintained web-based applications and system features, ensuring efficient performance and scalability for company projects.

Implemented backend and frontend functionalities using modern web technologies, improving system usability and responsiveness.

Collaborated with the development team to debug, optimize, and enhance software solutions, ensuring reliable and high-quality application performance.

Education

STI College

Associate's Degree, Information Technology · (2014 - 2016)
